Public Speaking - Simple Steps to Success

Self Review	Peer Review	Success Criteria
		Take a deep breath and remember everyone listening is supporting you
		Connect with your audience through eye contact (look for a person who is engaging with you and focus partly on them)
		Speak with confidence (even if inside it doesn't feel that way)
		Keep your pace steady and don't rush (especially towards the end)
		Vary volume (but make sure you can always be heard)
		Think about your body language and posture
		Intonate your words carefully
		Will you need any props or prompts?
		Think about your position in the room: can everyone see you?
		If you rehearse, be prepared to act on feedback
		Consider using rhetorical questions
		Perhaps include the rule of 3
		Enjoy it!
